Introduction

The Imagistik Image Viewer requires the free **Microsoft Framework** version 2.0 or higher.

Imagistik Viewer requires that the **Adobe Reader** (free version) be installed on the PC.

The basic version of Imagistik Image Viewer is free. A paid version of Imagistik Image Viewer includes options for converting TIFF (and other graphics) files to PDF and converting PDF files to TIFF (and other graphics) files and includes Optical Character Recognition (OCR). The paid version requires a license.

Imagistik Image Viewer has built-in links to many other utilities, such as TIFF and graphics markup and edits, PDF markup and edit, Append TIFF and PDF, extended scanning, etc. Links to these utilities are shown in the File menu. The utilities need to be downloaded and installed separately. Separate license fees will apply.

To view PDF file in Imagistik Image Viewer, you need a late version of the free Adobe Viewer installed on your PC.

When overwriting files, make sure that all affected files are safely backed up.

Please contact technical support if you encounter problems or have suggestions for improvement.

Please check the www.informatik.com web site often for software upgrades.

License fees indicated in this user guide are subject to change.

Free Version

The standard version of Imagistik Image Viewer software license is free (advertising-supported) for personal, educational and small-business use. The paid version supports the Tiff-to-PDF and PDF-to-TIFF conversion and OCR functions. Several linked programs, as outlined below, require separate installation and licensing.

Open a File

Open a graphics file from Open File in the File menu or click on the icon in the toolbar. The supported graphics formats are listed below.

The Open File Dialog allows you to pre-select multiple files. If pre-selecting multiple files, use the CTRL key to select individual files, or the SHIFT key to select a contiguous range of files. If you have pre-selected multiple files, you can navigate thru the selected files with the Open Next File and Open Prior File options in the File menu, or the equivalent buttons in the toolbar. These options are disabled if you have not pre-selected any files.

Please see 'Command Line Method' section below for opening files via a command-line.

Graphics Formats

The Imagistik Image Viewer supports the following graphics formats

TIFF, single page and multi-page, also JPEG-compressed TIFF
PDF, single page and multi-page
BMP
PNG
GIF
JPEG

Multi-page TIFF Files

When viewing multi-page TIFF files, you can navigate thru the pages with the **Page Navigation** buttons (First Page, Prior Page, Next Page, Last Page, Select Page), or from the Pages menu, or right-click on the image window and select the option, or use the keyboard's Left Arrow/Right Arrow/Home/End keys. For the shortcut keys, see the Pages menu.

The pages of a multi-page TIFF files can be displayed as **thumbnails**. To enable thumbnail display, click on the Thumbnails button in the thumbnails frame, or choose the equivalent function in the View menu. By default, thumbnails are displayed for multi-page files. You can change the default setting in Setup (File menu).

Viewing Options

The images can be displayed in the following modes:

- Actual size (default)
- Fit to Width
- Fit to window

The sizing options can be found in the toolbar and in the View menu. A chosen option generally stays effective until changed.

In Actual Size and Fit-to-Width mode, you can navigate thru the image with either the **Panning window** or the scrollbars or mouse wheel. For large dimension files, we recommend that you use the panning feature. To activate Panning, simply click on the Panning icon in the toolbar or choose the function in the View menu. In panning mode, a miniature of the image is displayed in the separate panning window, placed to the left of the screen. A red outline inside the miniature image reflects the area of the image that is displayed in the main window. Simply move the red rectangle to the respective area in the main display. The panning window can be activated from the View menu or by clicking on the icon in the toolbar.

The scrollbars can be locked. In locked mode the images are always opened at the scrollbar locked position. See Lock Scrollbar section below.

OCR (Optical Character Recognition)

The licensed version of the program includes a basic OCR option. With the mouse, outline the rectangle that you wish to OCR and select the OCR option from the popup drop-down menu. The process may take several seconds. The output text is displayed in a Notepad window. The program uses the Tesseract OCR engine. No support can be given.

The initial installation includes the necessary Tessdata language files for English only. The default language is English but you can change the default in Setup.

The Language dropdown list also includes French, German, Spanish, Italian, Portuguese and Dutch. However, for these languages you need additional Tessdata language files, freely downloadable. If needed, please go to www.informatik.com/ocr.html web page and download the necessary language files. Unzip the downloaded file and add the files to the Tessdata subdirectory. The files for all the required languages must be in that same folder. When you click on a language in the Language dropdown, the system will tell you the name of the subdirectory.

For a extensive stand-alone Optical Character Recognition program please try our Informatik OCR. A free trial version can be downloaded from www.informatik.com.

Application to be Launched

The program allows you to launch up to three (3) other applications. When launching another application, the current image file name is passed to it as an argument.

- Specify up to three (3) applications in Setup.
- After restarting the program, the applications are listed in the File menu.
- Just click on the application listed in the File menu.

Custom Arguments: By default, the file name is passed to the Application. Additional argument elements can be passed with the Custom Arguments options. Use [f] as the placeholder for the filename and [d] as the placeholder for the filename's directory. For example, to open a folder that contains the current file, select the `c:\windows\explorer.exe` as the application and set the Custom Argument to [d]. To merely select the folder (without opening it), set the Custom Argument to `/select,[d]`. To force the filenames to be encapsulated in single quotes, for example, use the string "[f]" (including the quotes). To add a switch, for example, the string would be `/a "[f]"`

Printing

The printing option can be found in the toolbar or the File menu.

Lock Scrollbars

You may want to open all files (or pages of TIFF files) with the horizontal and/or vertical scrollbar defaulted to a specific position. The option is functional for TIFF viewing. The procedure to lock the scrollbars is as follows:

- Open a TIFF file.
- Set the horizontal and vertical scrollbar to the desired position.
- From the View menu, click on Scrollbar Lock (On/Off toggle). The menu item will be checked. A red tag is displayed in the toolbar.
- Open another file (or page); the scrollbar positions will be retained.
- To cancel the Scrollbar Lock, uncheck the menu item in the View menu or simply click on the red tag in the toolbar.

Command-Line Method

Files can be opened in the Imagistik Image Viewer via a commandline. The commandline string must consist of the Imagistik path name followed by the file name, for example: C:\Program Files\Informatik Inc\Imagistik Image Viewer\ImagistikImageViewer.exe C:\SomeDir\SomeFile.tif. By default, each command opens a new instance of the Imagistik Image Driver. If the file name in the command line is preceded by a pound sign (#), then the file is opened in the existing instance of the Imagistik Image Driver. In this case, an item in the File menu called 'Keep This Window Open' appears. If this menu item is checked, the window will stay open even if other commands are sent.

Conversions of TIFF etc. to PDF

(Paid version only)

This option converts the currently open TIFF (or GIF, PNG, BMP, JPEG) to PDF. If you convert a multi-page TIFF file to PDF, a multi-page PDF will be created. The Conversion menu has options to save all pages, just the current page or a

range of pages. The converted PDF file is a non-searchable raster-based PDF file. The Save dialog includes an option to create password-encrypted PDF files.

Conversions of PDF to TIFF etc.

(Paid version only)

This option converts the currently open PDF file to TIFF, GIF, PNG, BMP or JPEG. Only TIFF files can be multi-page. If you convert a multi-page PDF file to TIFF, a multi-page TIFF will be created; if you convert a multi-page PDF file to a format other than TIFF, the pages will be serialized, one file per page. The Conversion menu has options to save all pages or a range of pages. Most PDF files are converted faithfully; there may be some substitutions in fonts or non-converted objects.

Scanning

The program includes a simple scanning function in the File menu (using the scanners own dialog window). For a fully featured scanning software, please download and install the free trial version of the Informatik Scan program. Once the program is installed and run at least once (to establish a link) it can be launched directly from the File menu.

Append TIFF Files, Append PDF Files

For utilities to append, insert, remove and re-arrange pages in multipage TIFF and PDF files and to append/concatenate TIFF and PDF files, please download and install the free AppendTIFF and AppendPDF programs. Once the programs are installed and run at least once (to establish a link) they can be launched directly from the File menu.

Reformat Graphics Files

For a program to reformat graphics files (TIFF, GIF, PNG, BMP, JPEG), please download and install the free Informatik Reformat program. Once the program is installed and run at least once (to establish a link) it can be launched directly from the File menu.

Markup PDF Files, Markup TIFF and other Graphics Files

For utilities to markup TIFF and PDF files (annotations, redactions, highlighting, watermarks, drawings, shapes, etc.), please download and install the free Informatik PDF Markup and Informatik Image Markup programs. Once the programs are installed and run at least once (to establish a link) they can be launched directly from the File menu.

Other Software

Please visit www.informatik.com for more software titles. Free trial versions of all programs can be downloaded.

Customization

Please contact Informatik Inc.

License Agreement

Please read the terms carefully before installing and using the software, as such conduct will indicate your acceptance of all of the terms of this license agreement. If you do not agree with the terms, the software cannot be licensed to you and you must un-install and return the software to distributor.

This License Agreement is a legal agreement between Informatik Inc. a Delaware Corporation ("Licensors"), and you, the user ("Licensee"), and is effective the date Licensee installs the software.

This Agreement covers all materials associated with the Imagistik Image Viewer, including, without limitation, the downloadable software product, online documentation, and any additional supporting electronic files (herein, the "Software").

The Software license is free fro personal, educational and small-business use. Companies that have more than 3 users of the Software must purchase and pay

for a license. Licensor is free to discontinue the Software or to change the licensing model anytime without notice.

1. GRANT OF LICENSE

Licensors hereby grant to you, and you accept, a nonexclusive license to use the Software according to the following condition:

You may use the Software on one (1) computer (PC or workstation) owned, leased, or otherwise controlled by you for personal or business purposes, and only as authorized in this License Agreement. The Software may not be used on other computers, nor may it be used by, or transferred to, other computers over a network. The software may not be used in web applications or run over the Internet.

2. LICENSOR'S RIGHTS

Licensee acknowledges and agrees that the Software is proprietary to Licensors and protected under international copyright law. Licensee further acknowledges and agrees that all right, title, and interests in and to the Software, including associated intellectual property rights, are and shall remain with Licensor. The License Agreement does not convey to Licensee an interest in or to the Software, but only a limited right of use that may be revoked in accordance with the terms of this License Agreement.

3. OTHER RESTRICTIONS

This License Agreement strictly forbids distribution of the Software with Licensee's application. Distribution of the Software with Licensee's application requires separate authorization and the payment of license fees.

Licensee agrees to make no more than one (1) back-up copy of the Software. Licensee agrees not to assign, sublicense, transfer, pledge, lease, rent, or share the rights assigned under this License Agreement. Licensee agrees not to reverse assemble, reverse compile, or otherwise translate the Software.

4. TERM

This License Agreement is effective when Licensee installs the Software and shall terminate only if the terms of this License Agreement are broken. Licensee agrees to destroy the Software upon termination of this License Agreement.

6. NO WARRANTY; LIMITATION OF LIABILITY:

LICENSEE ACKNOWLEDGES THAT THE PROGRAM IS PROVIDED ON AN "AS IS" BASIS WITHOUT WARRANTY OF ANY KIND. LICENSORS MAKES NO REPRESENTATIONS OR WARRANTIES REGARDING THE USE OR PERFORMANCE OF THE SOFTWARE. LICENSOR, DEVELOPERS, COPYRIGHTHOLDERS, DISTRIBUTORS EXPRESSLY DISCLAIMS THE WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR

PURPOSE. LICENSOR SHALL HAVE NO LIABILITY TO LICENSEE OR ANY THIRD PARTY FOR ANY LOSS OR DAMAGE CAUSED, DIRECTLY OR INDIRECTLY, BY THE SOFTWARE, INCLUDING, BUT NOT LIMITED TO, ANY INTERRUPTION OF SERVICES, LOSS OF BUSINESS, LOSS OF DATA OR SPECIAL, CONSEQUENTIAL OR INCIDENTAL DAMAGES.

7. GOVERNING LAW

This License Agreement shall be construed and governed in accordance with the laws of Pennsylvania.

8. SEVERABILITY

Should any court of competent jurisdiction declare any term of this License Agreement void or unenforceable, such declaration will have no effect on the remaining terms thereof.

9. NO WAIVER

The failure of either party to enforce any rights granted hereunder or to take action against the other party in the event of any breach hereunder shall not be deemed a waiver by that party as to subsequent enforcement of rights or subsequent actions in the event of future breaches.

10. COPYRIGHTS
